Art Unit: 1625

In view of the amendment filed on 10/06/2006,, the examiner has decided to apply further the restriction requirement to the current application.

Election/Restrictions

A. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 3-9 and 12-13, drawn to non-heterocyclic compounds containing a sulfonyl group , a sulfonyl , thiol ether group, an ether group, or their combinations thereof classified in class 558, subclass 61, class 568, subclass 38, and class 564, subclass 28.

II. Claims 3 and 7, drawn to heterocyclic compounds containing an epoxide or dioxirane group, classified in class 549, subclass 200.

1. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case there are two different inventions I

Art Unit: 1625

and II. The invention I is related to non-heterocyclic rings wherein moieties are selected from various non-hetero functional groups : a sulfonyl group or a sulfonyl or thiol ether group, an ether group, whereas the invention II is related to heterocyclic rings, which contain an epoxide and/or dioxirane group.

They have different structures and different functional groups in their respective ring, thereby exhibiting a chemically different activity respectively. Furthermore, they are classified in different classes and subclasses; therefore, it is a burden for the examiner to search those broad classes and subclasses.

In addition, each invention has a different use and effect due to unrelated substituents attached to the core of the compounds.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
